

STATISTICA

STATISTICA 6 SINGLE USER EVALUATION INSTALLATION INSTRUCTIONS

Users running Windows NT, 2000, or XP on their client machines must login with Administrator permissions to complete the client installation. The installation makes necessary changes to the system. If the user is prompted to reboot during the installation, he/she must login with Administrator permissions after rebooting to successfully complete the installation.

If you have a previous version of *STATISTICA* already on your computer, please use Control Panel - Add/Remove Programs to un-install the old program. (Note that this method of un-installing *STATISTICA* will not affect (will not remove) any data files created with previous installations.) Once this is complete, please proceed with the following instructions for installation:

Installing

1. Ensure that no other applications are running.
2. Insert the *STATISTICA* CD into the CD-ROM drive. The installation process should begin automatically. If the CD does not auto-start, browse the CD and double-click on *Setup.exe*.
3. The *STATISTICA* installation screen will appear. Click on *Install STATISTICA*.
4. The Welcome screen will appear. Click the *Next* button.
5. In the *CD Key / Net ID* dialog, enter the CD key and Net ID (if applicable) in the appropriate boxes. You will find the key on a sticker on the back of the CD case, below the serial number. Click *Next* to continue.
6. In the *Date Code* dialog, enter the 10-digit Date Code in the appropriate box. You will find the code on the sticker on the back of the CD case, below the CD Key. Click *Next* to continue.
7. Read the software license agreement, and then click *Yes* if you agree with the terms and wish to continue the installation process.
8. To install to the default destination, click *Next* on the *Choose Destination Location* dialog. If you wish to install to a different destination, click *Browse* and select another destination, and then click *Next*. If the specified destination folder does not exist, Setup will create it automatically.
9. In the User Information dialog, enter the requested information in the appropriate boxes. The serial number is located on a sticker on the back of the CD case. This information is required for setup to continue. Click *Next* to continue.
10. Select either *Typical Setup* or *Custom Setup*, then click *Next*. *Typical Setup* will install *STATISTICA* with the most common options; this is recommended for most users. *Custom Setup* will allow you to choose the options that you want to install; this is recommended for advanced users.
11. If you chose *Typical Setup*, you will be asked if you want to install the Multimedia files to your hard drive. These are movies that provide overviews of various aspects of the *STATISTICA* system. We recommend that you install them if you have sufficient disk space but they can also be viewed from the CD at any time. If you chose *Custom Setup*, you will be given the opportunity to install the Multimedia files on the *Select Components* screen.
12. To begin copying files to your machine, click *Next*.
13. You should receive a message stating that the installation is complete. You may be asked if you wish to reboot now or reboot later, depending on the components that were previously installed on your machine. If you are asked, it will be necessary to reboot before you run *STATISTICA*. Click *Finish* to complete the installation process.
14. Version 6 example datasets are located within the *STATISTICA* directory: if you accepted the default installation path, they will reside in the following directory:
C:\Program Files\StatSoft\STATISTICA 6\Examples\Datasets.

Un-installing

In case you need to un-install *STATISTICA* (for example, in order to install it on another computer), follow these steps:

1. Ensure that no other applications are running.
2. Choose Control Panel - Add/Remove Programs to un-install *STATISTICA*.
3. The Welcome screen will appear. Select *Remove*, and click the *Next* button.
4. A confirmation screen will appear asking if you want to completely remove the application and all of its components. Click the *OK* button.
5. The *Maintenance Complete* screen will appear. Click the *Finish* button.
